

TWP® 1500 Series

TWP® 1500 SERIES PRESERVES NATURAL WOOD COLOR!

TWP® 1500 Series is an EPA registered wood preservative which prevents structural damage and wood decay on exterior above ground wood surfaces such as untreated or previously treated fencing, decking, wood siding, log homes and roofing. TWP® 1500 Series resists water absorption that causes warping, cracking and splitting as well as preventing freeze damage in colder climates.

TWP® 1500 Series is a low VOC preservative with special U.V. absorbing pigments that prevent unsightly wood graying, darkening and fading. The selected mildewcides inhibit the growth of mold and mildew which assist in preventing premature discoloration.

TWP® 1500 Series will keep your wood beautiful, fresh and looking new longer. The ease of application and maintenance will allow you to enjoy your investment for years to come.

Key Features

- EPA registered wood preservative
- Professional choice for all exterior wood surfaces
- Semi transparent stain preserves natural color
- Repels water longer
- Aids in color retention
- Eliminates mold and mildew
- Helps prevent wood rot
- Easy to apply and maintain

TWP® 1520 PECAN

TWP® 1530 NATURAL

* Also available is **TWP® 1500 Clear**, which is NOT intended for color retention, allowing the wood to gray naturally.

** Due to different substrates, wood density, sanding, wiping and application methods, and atmospheric conditions, **ALWAYS** check actual stain color for accuracy before finish work process begins. Manufacturer is not responsible for color variance following application of the product.
