

LOG WASH

Log Home Cleaner

Log Wash is a liquid concentrate for cleaning log and wood surfaces. It can be used as a maintenance cleaner or to prepare the surface of wood for a new coat of stain or topcoat.

For preparing the surface of bare for a new coat of stain, Log Wash removes dirt, grime, pollen and surface mold and mildew without harming the wood or the finish. As opposed to bleach solutions, Log Wash does not upset the natural pH balance of the wood, thus preventing wood fiber damage and iron tannate stains. (To treat gray, UV-exposed wood see [Wood ReNew](#))

Before

After

The exterior of a log home are a settling ground for dust, pollen and other airborne contaminants that dull the surface and encourage mold growth. A light cleaning once or twice a year will keep a home looking beautiful and helps prolong the life of the exterior wood finish.
