

WOOD RENEW

Wood Cleaner

Wood ReNew is a biodegradable percarbonate-based wood cleaner that cleans and brightens grayed and weathered wood. Use it to return wood to its original natural color before applying any of our quality wood finishes.

Wood ReNew contains a thickener that helps it adhere to log walls and siding. Simply wet down the surface you want to clean, mix the Wood ReNew concentrate with water, stir, and liberally apply it to the wood with a mop or brush.

Wood ReNew will immediately begin to fizz and foam as it removes dirt and grime. After about 10 minutes scrub the wood with a medium-bristle brush and rinse thoroughly with clean water. Dirt, mold, mildew, water stains and UV damage will be gone and the wood will have a new, fresh look.

Don't apply Wood ReNew in direct sunlight. **Apply from bottom up, rinse from top down.**

Features and Statistics

- **Removes UV graying, water stains, mold, mildew and unbound pigment**
- **Returns wood to natural color**

Shelf Life	<ul style="list-style-type: none">• 5 years
